5. Additional Information. (Space will expand to fit your text.)

This project had several excellent environmental benefits, controlling nutrient and sediment losses from entering Bear Creek and Beaver Creek. A manure storage system, roofed barnyard runoff control system, critical area stabilization and waterway, along with an updated conservation plan in RUSLE2 and a SNAPPLUS nutrient management plan, have helped this landowner achieve full compliance with the NR151 Performance Standards and Prohibitions. Very willing and cooperative landowners to work with.
